	Connector	3-pin terminal block, DC socket	3-pin terminal block, DC socket
	Consumption	140 watts	6 watts
Mechanical	Dimensions (W x D x H)	148 x 25 x 134 mm	148 x 25 x 134 mm
	Enclosure	IP30 metal	IP30 metal
	Mounting	DIN-rail, wall-mountable and magnetic wall mount	
Environment	Operating Temperature	-40~75 degrees C	-10~60 degrees C
	Operating Humidity	5% to 95%RH (non-condensing)	5% to 95%RH (non-condensing)
Regulatory	Emissions	FCC Class A, CE Class A	FCC Class A, CE Class A
	Stability	IEC60068-2-32 (Free Fall), IEC60068-2-27 (Shock), EC60068-2-6 (Vibration)	

Industrial Flat-type Gigabit Router
Wall-mount Design, Perfect for Public Facilities

PLANET WGR-500 Series, an all-in-one router solution suitable for industrial applications, features 4-port 10/100/1000BASE-T Gigabit Ethernet and 1-port 100/1000BASE-T Gigabit Ethernet. It offers Layer 3 dynamic IP (DHCP Client), static IP, PPPoE, L2TP, PPTP, intelligent Layer 2 and Layer 4 management functions, and user-friendly interface.

Equipped with 4-port 802.3at PoE+ and in-line power interfaces, the WGR-500-4PV and WGR-500-4P centrally manage power supply to PoE IP cameras and PoE sensors at factories. The WGR-500 Series provides firewall to protect IoT devices against networking attack such as denial-of-service (DoS) and emerging malicious traffic before attacks occur. With firewall protection, it prevents IoT network from threats and keeps networking secure. The WGR-500 series is an ideal solution to meet the demand for the following network applications:

- Building/Home automation network
- Internet of things (IoT)
- IP surveillance
- Wireless LAN

Flat-type Ethernet Switches

Security Building Automation Switches

Suitable for buildings where security is strictly to be enforced, PLANET Industrial Wall-mount Managed Switches offer a comprehensive Layer 2 to Layer 4 Access Control List (ACL). The switches can restrict network access by denying packets based on source and destination IP address, TCP/UDP ports or defined typical network applications. The WGS-5225 Series incorporates advanced ITU-T G.8032 ERPS (Ethernet Ring Protection Switching) technology into customer's industrial automation network to enhance system reliability and uptime. With PLANET Industrial Wall-mount Managed Switches, a tightly-controlled network can be easily had in no time.

FTTX/MAN Application

PLANET Industrial Wall-mount Managed Switches adopt the double tag VLAN (Q-in-Q) technology to provide low cost and easy operation for service providers carrying traffic for multiple customers across their networks. With two dual-speed SFP slots built in, the deployment distance of PLANET Industrial Wall-mount Managed Switches can be extended up to 120 kilometers (single-mode fiber), which provides a high-performance edge service for FTTx solutions.

To build a network solution of FTTH (Fiber to the Home) or FTTC (Fiber to the Curb) for ISPs, and FTTB (Fiber to the Building) for enterprises, the various distances of SFP and BiDi (WDM) transceivers are optional for customers. For security and various applications, the 8 Gigabit ports of PLANET Industrial Wall-mount Managed Switches can be configured with VLAN settings and connected to different units, offices, floors, houses and departments.

Unique Flat-type Design with Touch LCD Screen or PoE Functions for Efficient Management

To facilitate the network deployment in any space-limited locations like wall enclosure or electric box found in buildings or outdoors, PLANET has the industrial Ethernet switches and wireless AP designed in a compact flat type. The products can be installed by fixed wall mounting, magnetic wall mounting or DIN rail, thereby making its usability more flexible. With the intuitive LCD Touch Screen or PoE Functions including PD alive check, scheduled power recycling, PoE schedule and PoE usage monitoring, PLANET's flat-type switches greatly promotes efficient and timely network management, perfectly suitable for surveillance, wireless and VoIP networks.
